X^e ATR 05 Technical Data

● Visible Light Transmission	06%
● Visible Light Reflection	07%
● Solar Energy Transmission.....	17%
● Solar Energy Reflection	08%
● Solar Energy Absorption	75%
● UV Transmission	<1%
● Shading Coefficient (b Value)	0.43
● SHGC	0.38
● Glare Reduction.....	84%
● NIR blocking at 1025 nm.....	78%
● Total Solar Energy Rejected	69%

Characteristics & Benefits

- Ceramic Film.
- Adds value, dramatically increasing the look of your vehicle.
- Provides improved privacy.
- Cuts excess summer solar heat through the glass, and can allow the driver and passenger to switch off the vehicle's air conditioning system more often, which can thereby improve fuel efficiency.
- Cuts glare down, reducing eyestrain.
- UV rejection protects your car's interior from fading and cracking.
- Effective protection against shard of broken glass in the event of an accident.
- Known for their quality and the high-quality scratch-resistant coating, Xe films are durable and virtually maintenance free.
