

X^e VS 60 Technical Data

☐ Solar Energy Transmission.....	31%
☐ Solar Energy Reflection- Exterior.....	28%
☐ Solar Energy Absorption.....	41%
☐ Visible Light Transmission.....	58%
☐ Visible Light Reflection- Exterior.....	8%
☐ Visible Light Reflection- Interior.....	8%
☐ Shading Coefficient (b Value).....	0.49
☐ UV Transmission.....	<1%
☐ Emissivity.....	0.67
☐ U-Value (EN 673 W/m ² K)	4.87
☐ Glare Reduction.....	34%
☐ Coefficient of Total Energy Transmission (g Value)	0.41
☐ Total Solar Energy Rejected.....	58%

Characteristics & Benefits

- ☐ Solar control and privacy film.
- ☐ Significant improvement of working conditions due to high reduction in solar heat gain
- ☐ Reduction in air-conditioning costs and hence reduction in energy costs
- ☐ Glare reduction.
- ☐ Excellent anti-UV protection integral to the polyester, reduces fading of textiles, furniture, and works of art.
- ☐ Scratch resistance coating: increased longevity and easy cleaning.
- ☐ Interior installation.
